

## **Community field report for Claxby Parish Council Meeting May '26**

Regular visual checks of the play equipment and surrounding facilities continue. The only issues that have arisen recently have been overfull waste bins and a lost handle plug for the rocker. Both have been addressed successfully. The Annual inspection will take place in August.

George Colletti Tree Services completed a canopy lift of trees along the roadside perimeter and removed a dead Cherry tree.

The Highways volunteers have agreed to help us again and will be helping to clear natural debris from the ditch which borders the woodland perimeter of the field. This work is due to take place in early July.

Unfortunately the dog walking area continues to have incidences in which dog owners are not diligently picking up after their dog. The field is almost immaculate. Owners of dogs using the area – please continue to be vigilant – children use this area too.
